**Workshop on the Implementation Guide  
 for the GBEP Sustainability Indicators for Bioenergy**

**PRELIMINARY AGENDA**

The GBEP Task Force on Sustainability (TFS) is working to enhance the practicality of the GBEP Sustainability Indicators for Bioenergy (GSI) by producing an Implementation Guide to complement its GSI report. In this context, in 2017 progress has been made in the development of a **technical report on Attribution** and of a **technical paper on the relation between SDGs and GSIs**, as kind contributions by the German Government.

The technical report on Attribution aims to highlight the attribution of impacts to bioenergy production and use, while the technical paper will highlight the relation between SDGs and GSIs and will determine how they may be mutually reinforcing. As a contribution to and support towards the development of this latter paper, a GBEP international workshop was organized in Bonn on 3-4 July 2017 to further discuss the importance of the linkages between SDGs and GSIs.

This workshop in Rome represents the opportunity to further discuss the status of the development of the Implementation Guide, with particular reference to these two streams of work.

**15<sup>th</sup> Meeting of the GBEP Task Force on Sustainability**  
*FAO Headquarters, Philippines Room C-277/281*  
Rome, 29 November 2017

**PRELIMINARY AGENDA**

During the GBEP meetings held in Rome, in November 2014, it was suggested to develop an Implementation Guide on the use of the GSIs, in order to:

- Facilitate the testing and implementation of the GSIs by future users, enabling them to take advantage of relevant lessons learned; and
- Clarify and explain in more detail some identified issues within the methodology sheets in the 1<sup>st</sup> edition of the “Global Bioenergy Partnership Sustainability Indicators for Bioenergy” report, by:
  - Ensuring a better integration of definitions and methodologies;
  - Ensuring an effective implementation of the indicators; and
  - Enhancing the practicality of the indicators.

A scope of work of the Task Force on Sustainability for the production of an Implementation Guide on the use of the GBEP Sustainability Indicators for Bioenergy (GSIs) was developed and further endorsed by the GBEP Steering Committee in 2015.

In 2017 the Task Force has been working towards the development of the Implementation Guide through regular teleconferences of the re-instated three sub-groups on the Environmental (led by Germany), Social (led by Argentina and FAO) and Economic (led by Japan and Italy) indicators. In addition to this, progress was made in the development of a technical report on Attribution and of a technical paper on the relation between SDGs and GSIs, as kind contributions by Germany.
