## 17<sup>th</sup> Meeting of the GBEP Task Force on Sustainability

*FAO Headquarters, German Room C 269/C 229 (tbc)*

Rome, 29 October 2019

During the GBEP meetings held in Rome, in November 2014, it was suggested to develop an Implementation Guide on the use of the GSIs, in order to:

- Facilitate the testing and implementation of the GSIs by future users, enabling them to take advantage of relevant lessons learned; and
- Clarify and explain in more detail some identified issues within the methodology sheets in the 1<sup>st</sup> edition of the “Global Bioenergy Partnership Sustainability Indicators for Bioenergy” report, by:
  - Ensuring a better integration of definitions and methodologies;
  - Ensuring an effective implementation of the indicators; and
  - Enhancing the practicality of the indicators.

A scope of work of the Task Force on Sustainability for the production of an Implementation Guide on the use of the GBEP Sustainability Indicators for Bioenergy (GSIs) was developed and further endorsed by the GBEP Steering Committee in 2015. Since then the Task Force has been working towards the development of the Implementation Guide through regular teleconferences of the three re-instated sub-groups on the Environmental (led by Germany), Social (led by Argentina and FAO) and Economic (led by Japan and Italy) indicators.
