Management Institute, Accra, Ghana, **Tilahun Amede**,
ICRISAT, Kenya, **Christopher Auricht**, **Rosemary Lott** and
George Mburathi

Series: Earthscan Food and Agriculture

Africa has an immense variety of farming systems. Knowledge of these complex systems, set in their socio-economic and environmental context, is an essential ingredient to developing effective strategies for improving food and nutrition security. This book systematically and comprehensively describes and classifies the characteristics, trends, drivers of change and strategic priorities for each of thirteen African farming systems and their main subsystems. Highly illustrated in full colour throughout, it provides an essential follow-up to and application of the seminal work *Farming Systems and Poverty* by Dixon and colleagues (FAO/World Bank, 2001).
