

The forest-water nexus: creating resilience through capacity development

WORLD WATER WEEK 2021

Tuesday, 24 August, 17:00-18:25 CEST

AGENDA

17:00 Welcome and introductions to training sessions

17:20 Breakout into training sessions

1. Can e-learning clarify the forest-water nexus?

Sara Casallas Ramírez (FAO),
Lotta Samuelson (SIWI), Elin Weyler (SIWI)

2. Enhancing resilience through capacity development for Eco-DRR

Rikiya Konishi (MAFF/FAO)
Karem del Castillo (FAO)
Abner Lawangen (FAO)

3. From the field to the virtual world, examples of capacity development on water and forestry in Fenno-scandian landscapes

Linnéa Jägrud (SFA)

18:20 Closing and final remarks

Session Description

The nexus between forests and water is vital for multiple sectors – including water, forestry, energy, agriculture and DRR, among others – and managing forests for water has multiple benefits for resilient and fair societies. However, capacity development for the improved management of forest and water resources often falls short of its desired impact and/or targets only limited sectors and actors.

This interactive training session will bring together organizations and government agencies that are leading the way in providing training on the forest and water nexus across sectors, countries and societies. It aims to improve participants' ability to characterize and explain forest-water interactions and explain why capacity development is needed across sectors. The session will equip participants with capacity development tools and examples to use in their own areas of work.

During the session, participants will have the opportunity to choose from different short trainings provided by each of the participating agencies and organizations.

To join

1. Register on: <https://www.worldwaterweek.org/tickets>
2. Chose limited access (free of charge, if you only like to join our meeting) or networking (if you want to network with other participants)
3. Meeting link on Pathable: [The forest-water nexus: creating resilience through capacity development](#) (ID 9724) – note that you need to be logged in in Pathable to access it.
4. Add the session to your schedule

Please make sure you have the **latest version of Zoom** in your computer to access all the features of the event.
